During the quarter, the division achieved sales volume of 10,659 MT against 8,980 MT in the corresponding quarter of the last financial year. The division achieved higher sales volume at the back of its strategic marketing approach despite prolonged monsoon which impacted the demand in the segment. We expect the demand to pick-up in the second half of FY26 from agriculture and construction sectors.

During the quarter, the division achieved sales volume of 4,033 MT against 4,034 MT in the corresponding quarter of the last financial year. The Flexible Packaging Division is driving its growth by diversifying its product range and offering customized solutions to its customers. The recent GST reforms are expected to provide a significant boost to consumption which shall lead to strong demand in H2FY2026.
